

Dear Valued Customers

YILPORT Liscont

YILPORT Liscont Announces New NET2 Service Call from the Diamond Line

YILPORT Liscont is proud to announce the addition of the North Europe - Türkiye Express 2 (NET2) service from the Diamond Line to its terminal. Starting August 20, this service provides a direct weekly connection between Lisbon and major ports in Northern Europe and the Mediterranean.

NET2 Routes

Haifa - Mersin - İskenderun - Alexandria - Piraeus - Salerno - Casablanca – YILPORT Liscont
- Felixstowe - Hamburg - Rotterdam - Antwerp

NET2 offers reduced transit times and more efficient transport solutions. With YILPORT Liscont's advanced infrastructure, the terminal can handle a wide range of cargo, including refrigerated (RF), out-of-gauge (OOG), and hazardous (IMO) goods, ensuring maximum flexibility and safety.

This new service call at YILPORT Liscont transforms import and export routes, positioning Lisbon as a strategic hub for direct connections with the Mediterranean, particularly Türkiye, and through the port of Piraeus, with the Far East. Additionally, it facilitates efficient exports to key distribution centers in Northern Europe and supports intra-European traffic.

Lisbon will also integrate NET2 with other services, such as ESE2 (ECSA - East Coast South America), enabling cross-trade cargo between the Mediterranean and South American destinations, including Brazil and Argentina.

YILPORT Liscont ensures exceptional global connectivity, establishing Lisbon as a central hub between Europe, the Mediterranean, and South America, while offering optimized routes for global transport.
